border oak outbuildings

Our outbuildings and garages have been designed to look beautiful whilst using optimum efficiency in the oak framed structure. This, together with Border Oak proportions, quality of materials and attention to detail not only means our buildings enhance their locations but also offer exceptional value for money.

An infinite number of configurations and designs can be developed from our standard models - log stores, storage, staircases, dormer windows, skylights and other features can all be added. Structures can be added to one another in bays and upgraded/insulated to change their purpose.

Made by hand from the finest natural materials the Border Oak outbuildings are inspired by traditional barns and buildings that are part of the countryside vernacular, reinterpreted to suit modern demands.

Past projects include school rooms, museums, extensions, annexes, studios, and humble garden storage. From potting sheds to pavilions, playrooms to party barns (and, of course, garages) our range is diverse and adaptable. Please contact us to discuss your ideas in more detail.
